REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Prior art of record fails to teach, or renders obvious, alone or in combination, all the independent claims 1, 8, and 9 which specifically comprise the following features in combination with other recited limitations:

mode selection: adaptively selects, for each frame, either a first coding mode or a second coding mode, where the first coding mode is of coding a frame by referring to another frame using an inter-frame coding method and the second coding mode is of coding a frame without referring to another frame using an intra-frame coding method;

adjust code data amount: discards code data corresponding to bitplanes from a least significant bit position to a predetermined bit position;

only when said mode selection unit selects the second coding mode for the input current frame, performs bit-shifting of the code data of the current input frame by a number of discarded bitplanes by said adjusting unit, decodes the bit-shifted code data of the current input frame, and stores the decoded image of the current input frame as the reference frame.

Claims 1, 5, 6, 8 and 9 (now renumbered as 1-5 for issue) are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
